

## Build and program your first robot from scratch!

The HP Robots Otto starter kit takes students from designing, 3D printing, building and programming their first functional robot. Get started with the basics of electronics, engineering and coding, extend functionality and learning experiences by customizing the robot through 3D design and expansions.

For students over 8 years, used in school or supervised at home. For students 14+ no supervision is requested.

Packed with teacher developed STEM+A resources, it includes everything a teacher could need to run a technology class. No prior knowledge is required!

## Main features

- Modular, programmable robot
- Obstacle avoidance
- Line following sensors
- Addressable color changing RGB lights
- Integrated buzzer robot sounds
- Wi-Fi connectivity
- USB-C serial communication
- Easy-clip connectors and no soldering is required

### Interact

Internet of Things

### Build

Easy and simple to program

### Learn

Creativity and problem solving

### Expandable

Let your imagination flow!

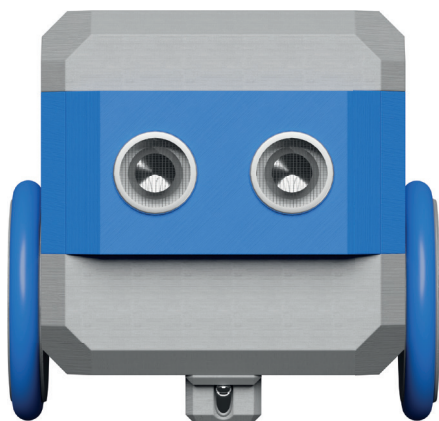

### Lessons and curriculum

Teach STEM+A with Otto!

### Rechargeable battery

Hours of fun!

## Types of kits

**creator kit** (requires a 3D printer)

| SKU           | Dimensions        | Weight | EAN           |
|---------------|-------------------|--------|---------------|
| HP-RO START C | 278 × 222 × 68 mm | 710 g  | 8595179514721 |

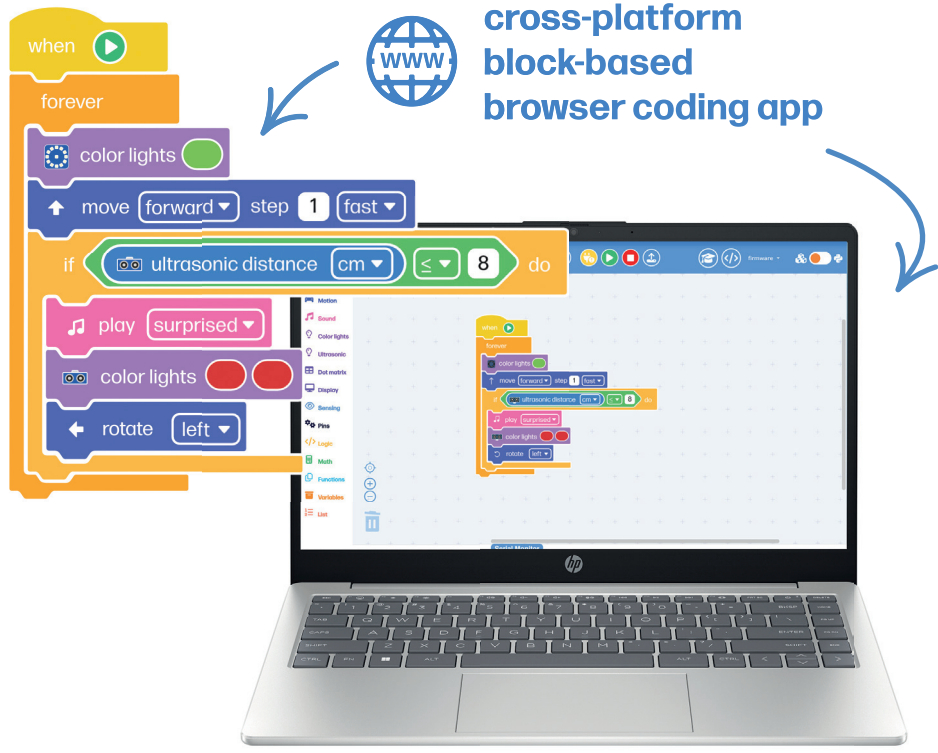

**builder kit** (includes all plastic body parts)

| SKU           | Dimensions        | Weight | EAN           |
|---------------|-------------------|--------|---------------|
| HP-RO START B | 278 × 222 × 68 mm | 805 g  | 8595179514714 |

# Web based simple programming

3 coding experiences:  
Control + Blocks + Text

 Python and C++  
compatible

cross-platform  
block-based  
browser coding app

## Kit components

create. connect. code.
